Cut along the dotted lines, assemble by page number and staple
along the marked area

Direct To: (if on an active flight plan)

1. Press Direct button $\mathcal{D} \rightarrow$ (PFD or MFD)
2. Active flight plan will pop up and next waypoint is highlighted
3. To go direct to that highlighted waypoint, press the ENTER button
4. Press Enter ENT again to activate

Direct To: (If not on an active flight plan)

1. Press Direct button $\mathcal{D} \rightarrow$ (PFD or MFD)
2. Blank page appears (active flight plan page) – Cursor Blinks
3. Turn small FMS knob (1) click to right – letter K appears
4. Spell identifier by turning small FMS knob and changing field locations with the large FMS knob
5. Press Enter ENT twice after identifier is spelled

Direct To Using Pointer:

1. Must be on Map page (press and hold CLR button)
2. Push Range button (activates arrow on map)
3. Use Range button as joystick to position arrow to waypoint
4. Press $\mathcal{D} \rightarrow$ Direct button
5. Press ENT Enter twice (note: map scale can be changed by turning range knob)

To Cancel a Direct To:

1. Press $\mathcal{D} \rightarrow$ Direct button
2. Press Menu (option screen blinks) highlight Cancel Direct To
3. Press ENT Enter

Note! If you cancel a Direct to when not in a active flight plan all course guidance goes away. If on an active flight plan, the G1000 will return to the active flight plan at the closest leg to you

Finding Airport / Facilities Near You Using The PDF:

1. On PDF, press NEAREST soft key (first 25 airports)
2. Scroll with Large FMS knob
3. Load frequency first (highlight freq.) and push ENT Enter
4. Scroll to airport with Large FMS knob
5. Press $\mathcal{D} \rightarrow$ Direct button
6. Press ENT Enter twice

Using The MFD:

1. Turn Large FMS knob to the right to FMS Nearest page
2. Use soft keys where possible
3. Press Apt, freq., r/w
4. Press FMS knob
5. Press $\mathcal{D} \rightarrow$ Direct button
6. Press ENT Enter twice

Rename Flight Plan on MFD: (with flight plan page open)

1. Press FMS knob
2. Move cursor to flt. Plan name (in stored flt. Plan box)
3. Press ENT to open flight plan if not open
4. With name highlighted, press CLR Clear
5. Use small FMS knob to choose new name on flight plan
6. Use large knob to change fields
7. Press ENT Enter
8. Press FMS button to turn off cursor

User Defined Waypoints (capture current Lat/Lon):

1. On waypoint page (user waypoint)
2. Press NEW soft key – this captures present position

On Map Page:

1. Press Range
2. Press Enter ENT
3. Create waypoint using FMS knob
